

# Resutile Wall

*Light fast, high chemical resistant floor coating*

## Product Data Sheet

Data Sheet Ref:TIWL 05/05 Page 1 of 2

### DESCRIPTION

RESUTILE WALL is a high grade, two-pack, hard wearing polyurethane wall coating designed for maximum chemical resistance which is light-fast and flexible. RESUTILE has good resistance to impact and abrasion. The system is resistant to high temperatures up to 150°C. Slight discolouration may occur at extreme temperatures.

### ADVANTAGES

1. Maximum chemical resistance
2. Seamless
3. Good abrasion and impact resistance
4. Easy cleaning, including removal of graffiti
5. Light-fast
6. Resistant to thermal shock & hot water
7. Hygienic - does not support fungus or bacterial growth
8. Attractive range of colours available

### GRADES AVAILABLE

#### RESUTILE WALL STD.

For general usage produced as a semi-gloss finish.

#### RESUTILE WALL MATT

Matt finish grade of RESUTILE produced as a three-pack product

### WHERE TO USE

RESUTILE is ideal where a seamless finish is required in such environments as:

Food preparation and manufacturing areas, laboratories, chemical plants, aircraft hangars, vehicle maintenance bays, abattoirs, breweries, mortuaries, bakeries, toilets, operating theatres and all areas where a long lasting, easily cleaned, high chemical resistance finish is essential.

**CAUTION:** Because of the solvents in RESUTILE, the product should not be applied near, or in the presence, of open food.

### PHYSICAL PROPERTIES

**Solids Content**  
approx. 60%

**Coverage**  
7-8 sq.m. per lt. per coat

**Dry film thickness**  
75 microns at a coverage rate of 8 sq.m. per lt.

**Pot Life at 20°C**  
40 minutes

**Tack free time**  
2 hours at 20°C

**Hard film time**  
6 hours at 20°C

**Full chemical resistance**  
5 days at 20°C

**Application temperature limits**  
+ 5° to 30°C

**Shelf life**  
6 months at ambient temperature

# Product Data Sheet

Data Sheet Ref:TIWL 05/05 page2 of 2

## ***SURFACE PREPARATION***

All surfaces to be coated with **RESUTILE** should be clean, dry and free from oil, grease etc.

## ***PRIMING***

Apply onto the properly prepared surface a coat of RESUSEAL W.B. CLEAR.

## ***MIXING AND APPLICATION***

Mix the base and hardener thoroughly together, ideally by slow speed mechanical mixer, scraping all loose material with a knife from the sides and base of the container to ensure a complete mix is obtained. Apply by brush, roller or spray. When dry and within a maximum period of 18 hours after drying, apply the second or subsequent coat of **RESUTILE**. Due to the pot life of **RESUTILE** the whole of the material has to be used when mixed within the time period.

## ***CLEANING***

Tools, brushes and mixing machines should be cleaned as soon as possible with R.S. P.U. Solvent.  
Do not allow to set hard.

## ***TECHNICAL DETAILS***

Samples of **RESUTILE** were tested by CAPCIS, an independent testing company. CAPCIS stated that the results indicated below showed good performance as a hard wearing floor coating.

### **(a) WATER VAPOUR PERMEATION**

Tested to **ASTM E96-80**, water transmission of materials - desiccant method. Average permeability value - **2.38 x 10<sup>-3</sup>g/mm/h/m<sup>2</sup>/mm Hg**.

### **b) LINEAR CO-EFFICIENT OF THERMAL EXPANSION**

Extension rod dilatometry method - **15°C - 30°C**.

Co-efficient of thermal expansion for the above temperature interval - **7.5 x 10<sup>-5</sup>°C**.

### **c) HARDNESS MEASUREMENT**

Tested to **ASTM D.2240-85** with Shore D Durometer. Average result from readings - **50.5 Shore D**.

### **d) ADHESION TESTING**

Tested to **BS.3900 Part E.10**.

(Pull off method), using Elcometer Model 106 adhesion tester. Lift force of pull-off readings - **233 psi**.

### **e) TABER ABRASION**

Tested to **ASTM D.4060** (Taber method) using a CS17 abrasive wheel at 1000g. load for 1000 revolutions. Total weight loss - **79 micrometres**.

### **f) IMPACT RESISTANCE**

Tested to **BS.3900 Part E7**. (falling weight impact method). Average result obtained from 20 measurements - **154 micrometres**.

Full details of all the above test results are available from Resin Surfaces Ltd.

## ***HYGIENE***

Due to the solvents present etc. smoking or naked lights should be prohibited and **RESUTILE** should not be applied in the presence of open food. Adequate ventilation should be provided and the use of barrier creams and wearing of glasses is recommended.

**RESUTILE** should not be allowed to set on skin.
